

GEYSER TECHNOLOGIES

ARAGON BIO

Patent №2506232

Aragon Bio filtering cartridge, combining the main methods of water treatment: mechanical, sorption and ion exchange. Effective reliable water purification from harmful impurities, heavy metals, bacteria and viruses is confirmed by the patent for the invention No. 2506232 dated February 10, 2014.

Removal of viruses from water confirmed by research institutions

BASCON

Mineralization technology developed by Geysler will allow you to get clean and healthy water saturated with minerals (potassium, magnesium, calcium). Purified water has balanced mineral composition.

It reduces the number of free radicals and reduces the RedOx potential.

Potassium improves brain activity. Helps to reduce swelling and normalizes blood pressure.

Magnesium normalizes the activity of the cardiovascular and endocrine systems of our body. Provides assistance when removing toxins and heavy metals.

Calcium strengthens bones. Provides normal body metabolism.

FILTERS WITH ARAGON CARTRIDGE

GEYSER STANDARD

- Standard cartridges 10SL
- Traditional water purification technology
- High quality coconut carbon

GEYSER MAX

- Patented water softening technology
- Wide range of removed contaminants
- The resource is 6 times higher compared to traditional filters
- Preservation of natural mineralization
- Standard cartridges 10SL

GEYSER SMART MAX BIO

- Patented water softening technology
- Removal of not only bacteria, but also viruses thanks to the Aragon Bio cartridge
- Wide range of removed contaminants
- The resource is 6 times higher compared to traditional filters
- Preservation of natural mineralization
- Convenient cartridge replacement in 30 seconds with one hand

ARAGON UNIQUE FILTERING MATERIAL

ARAGON BIO
100% PROTECTION
from bacteria and viruses

Aragon Bio

- Viruses removal
- Bacteria removal
- A combination of four treatment technologies to remove the world's largest spectrum of contaminants
- Silver in a safe indelible form
- Self-indication - water stops flowing through the cartridge at the end of the resource
- Anti-discharge - the impossibility of penetration of removed contaminants into purified water
- Certified by IAPMO (USA) to NSF42 standard

CATALON

Fe (Catalon)

- Water purification from heavy metals: Iron (Fe²⁺, Fe³⁺), Manganese (Mn²⁺), Lead (Pb²⁺), Zinc (Zn²⁺), Copper (Cu²⁺), Cobalt (Co²⁺), Nickel (Ni²⁺), Cadmium (Cd²⁺), Mercury (Hg²⁺)
- Certified by IAPMO (USA) to NSF42 standard

Mix Block

Brand New Premium Carbon Cartridge made of high-quality silver-plated coconut activated carbon with the addition of a unique ion-exchange material CATALON to improve the quality of treatment from iron and heavy metals.

CARTRIDGES FOR PITCHERS WITH NEW CATALON MATERIAL:

Purifies water from heavy metals (lead, copper, cadmium), iron and organic compounds. Removes chlorine, foreign odors and tastes, retains viruses*.

Contains silver in an indelible safe form, which excludes the reproduction of filtered microbes.

Does not contain antibiotics and biocidal additives.

*Confirmed by the results of an independent examination LLC «Innovation Center «Ental».

Fibrous filter material

Coconut charcoal and ion exchange resin

Catalon

CLEAR WATER TO THE LAST DROP

MEMBRANE FILTERS

GEYSER PRESTIGE SMART

Compact reverse osmosis system with quick release cartridges.

Clean and healthy water according to Bascon technology - contains a balanced mineral composition of useful microelements - calcium, magnesium, potassium.

GEYSER PREMIUM/ PREMIUM P

- Ideal water taste
- Optimal salt composition of purified water
- Aquaporin membrane (Denmark)
- Filtration rate 3 times higher (up to 750 l/day)
- 2 times less water consumption
- Housing made of transparent food-grade plastic

*compared to 50GPD reverse osmosis membrane

GEYSER ALLEGRO

- Dimensions 470x380x420 mm
- 3-stages cartridge pretreatment
- Carbon postfilter
- Productivity up to 200 l/day
- Storage tank 12 l (7,6 also available)
- Working pressure not less than 3 atm
- Patented mineralization technology Bascon

GEYSER ALLEGRO M
Filter with mineralizer
Treated water mineralization

GEYSER ALLEGRO P
System with pump
Used with working pressure from 1,5 atm

GEYSER ALLEGRO PM
System with pump and mineralizer

WARRANTY 3 YEARS

COMPACT FILTERS

WITH ARAGON CARTRIDGE

ECO/ECO FOR HARD WATER

Compact and stylish stainless steel filter

Effectively purifies water from chlorine, smells and odours. Eco for hard water provides removal of iron, manganese and heavy metals.

Extended resource up to 18 months

For regions with hard water, there is a special modification Eco Max with an increased resource to prevent scale formation

TABLETOP FILTERS, TAP FILTERS

GEYSER EURO

Comprehensive water purification thanks to the Aragon cartridge

Convenient and compact filter that takes up minimal space
Top Selling on Amazon.com

ECO MAX

- Tabletop filter for hard water
- Cartridge and housing are one piece
- Made from solid and safe plastic
- Connection to mixer via diverter
- Resource up to 6-12 months

GEYSER AQUA

Compact stainless steel tabletop filter

Wide range of contaminants and bacteria to be removed

COUNTRYHOUSE FILTERS

UNIVERSAL TREATMENT SYSTEM FITH ECOTAR MATERIAL

ECOTAR

A range of multi-component ion-exchange media for treating water with extremely high levels of contamination.

ECOTAR MATERIAL TYPES

Ecotar B (B30)

Ecotar A (A Bio)

Ecotar C (C30)

Ecotar B, B30 - for water purification from dissolved iron (B - up to 15 ppm, B 30 - up to 30 ppm), manganese and hardness salts with a low content of organic substances, ammonium.

Ecotar A - for water purification from dissolved iron, complex iron-organic compounds, manganese, hardness salts, ammonium.

Ecotar A Bio - for water purification from dissolved iron, complex iron-organic compounds, manganese, hardness salts, ammonium, as well as for water disinfection. Specially prepared activated carbon prevents reproduction of microorganisms (iron bacteria) in purified water and the appearance of foreign odors.

Ecotar C, C30 - for purification of water with a high content of natural organic substances, organic iron and manganese.

INLINE FILTERS HOUSINGS

FOR HOT WATER

TYPHOON

- Standard 10sL, 10BB, 20BB,
- Dimensions 10sL- 370x130 mm, 10BB 370x185 mm, 20BB 620x185 mm
- Stainless foodgrade steel housing
- Pressure relief valve
- Bottom drain for easy cartridge replacement

PREMIER

- Standard 10sL, 10BB, 20BB,
- Stainless steel housing
- Lack of cartridge bracket
- Drainage from housing
- Easy replacement

GEYSER HOUSINGS

- Standard 10SL
- Dimensions (polyamide) 185x125 mm
- Housing made of polyamide withstands pressure up to 30 atm

FOR COLD WATER

BASIS, GARANT, 10BB, 20BB

- Standard 10SL, 10BB, 20BB
- Dimensions Basis 370x130 mm
- Pressure relief valve

HOUSEHOLD APPLIANCES PROTECTION

TPF FOR WASHING MACHINES 1PFD FOR BOLIERS

Extends the life of washing machines, dishwashers and boilers.

Polyphosphate reduces limescale and binds dissolved iron.

REPLACEMENT CARTRIDGES

STANDARDS 10SL, 20SL, 10BB, 20BB

- **Mechanical cartridges**
PP, PFM, PFM G - expanded polypropylene
PYP, PPY - wind cartridges

- **Carbon cartridges**
CBC (carbon-block), Carbon-block Smart, Post-carbon Ag Smart, Carbon Ag Smart - coconut pressed activated carbon
Fiber Pro - large surface carbon fiber
GAC - bulk granulated coal
Mix Block - high-quality activated carbon

- **Special**
BS, Softening Smart, Ecotar Smart - removal of excess hardness salts. Regeneration possible
BA - catalytic loading (calcite) to remove dissolved iron
RSFE - for removal of dissolved and oxidized iron and heavy metals
BAF - multicomponent loading. Removes chlorine and organic impurities, reduces iron content
Combi Smart - multicomponent loading for effective pretreatment and for membrane protection
Bascon Smart - final treatment and water mineralization
Antiboron - multi-component loading based on sorption and boron selective ion exchange materials.
Provides effective removal of boron salts from drinking water
